

## Accessing Quiz and Exam Results

Quiz results can be accessed three different ways: through the quiz on the main course page, via the **Activities** block, and in the **User report**.

### Accessing Results through the Main Course Page

---

Click the hyperlink for the quiz from the main course page. The quiz may be hidden from student view if you are unable to view the hyperlink; contact your instructor if this is the case. The **Summary of your previous attempts** page will open; your grade will be displayed on this page. You can click **Review** to reenter the **Review quiz** page if your instructor has enabled review options.

### Accessing Results via the Activities Block

---

Locate the **Activities** block on your main course page. Contact your instructor if the block is not available. Click **Quizzes** in the **Activities** block; this will open a list of all available quizzes in the course. Grades for completed quizzes will be listed here; you can click on the link for a quiz to open the **Summary of your previous attempts** page. You can click **Review** to reenter the **Review quiz** page if your instructor has enabled review options.

### Accessing Results in the User Report

---

Locate the **Settings** block on your main course page. Expand the **Course administration** menu and click **Grades**. Your **User report** (report card) will open; you can click on the link for a quiz to open the **Summary of your previous attempts** page. You can click **Review** to reenter the **Review quiz** page if your instructor has enabled review options.
